PROJECT AURA - MICROSERVICES ARCHITECTURE HANDOVER
Author: Sarah Jenkins | Date: November 2026

1. ARCHITECTURAL DECISIONS
Decision: Decided to adopt gRPC with Protobuf v3 for internal microservice communication.
Decision: Selected Redis Cluster with multi-region replication for distributed session caching.

2. ROLES AND RESPONSIBILITIES
Lead: Sarah Jenkins is stepping down as Auth Lead; handing over to Elena Rostova.
Responsible: Tariq Al-Mansoor maintains database migrations and connection pool sizing.

3. CRITICAL RISKS AND BLOCKERS
Critical Risk: Gateway token bucket rate limiter causes thread starvation under 5,000 req/sec bursts.
Blocker: Third-party Identity Provider does not support OIDC backchannel logout.

4. NEXT ACTIONS
Next Action: Complete load testing of the session eviction worker before December 1.
Immediate Priority: Rotate TLS private keys across all ingress proxies.
